

PPB REGISTRY RECOMMENDATIONS FOR CHEMOTHERAPY

Type I PPB:

**One course of chemotherapy
(4 courses planned: weeks 0, 12**, 24**, 36**):**

See PPB Registry roadmaps for specific dosages

Week of therapy:	0	1	2	3	4	5	6	7	8	9	10	11
Vincristine:	V	V	V	V	V	V	V	V	V			
Actinomycin D:	A			A			A			A		
Cyclophosphamide:	C			C			C			C**		
MESNA:	M			M			M			M**		
G-CSF:	G...*			G...*			G...*			G...**		

* G-CSF used only for chemo delay or if chemo doses are modified for heme toxicity/significant bone marrow suppression

** "Week 9" cyclophosphamide, Mesna and G-CSF(if G-CSF is used, see *) are omitted in Course 2, 3, and 4 (at weeks 21, 33, and 45)

(This regimen closely follows COG low-risk rhabdomyosarcoma study D9602, with cyclophosphamide dose modifications consistent with noted hepatotoxicity observations)
